

A leading Bank with over 500 branches in Nigeria, and branches spanning other parts of Africa, Europe and Asia. The brand is synonymous with the deployment of state-of-the-art technologies in banking, and the deployment of Information & Communication Technology (ICT) infrastructure to create innovative products & services.

Sector: Banking  
Solution: FlexSecure (Checkpoint)  
Location: Lagos  
OEM Partner: Checkpoint

### **The Challenge**

A Lack of enterprise level security at network segments and perimeter, thereby exposing the Bank's network to internal and external attacks.

The Bank was looking for a better way to implement an enterprise level security solution to prevent malicious activities in the Bank network. The aim of the project was to achieve the following using a secure and flexible solution;

- Stateful and Deep Packet Inspection
- Next Generation Threat Prevention
- Next Generation Firewall
- Packet Filtering
- Network Visibility
- Data protection
- Anti-Virus, Anti-bot, Anti-spam.
- Advanced Threat Prevention
- Audit and Compliance

### **The Solution**

Through experienced project management practices and FPG professional delivery models, FPG deployed a FlexSecure product using Checkpoint Next Generation Threat Prevention

### **Business Benefits**

Advanced Threat Prevention, Network Security and Firewall

The deployed solution added security and flexibility in securing the Bank network.

The deployed solution helped deliver real value back to the business in the form of agile, simple, and complete security and advanced protection from malicious activities.

**Project Deployment Duration: Ten Days.**
