

A service Investment Bank and Asset Management company. Client uses in-depth industry knowledge, regional market expertise and an excellent network of investor and financial institutions to offer strategic financial advice and tailor-made financing structures to individuals, corporations, institutions, federal and state governments across Sub-Saharan Africa.

Sector: Financial
Solution: FlexSecure (Commvault)
Location: Lagos
OEM Partner: Commvault

The Challenge

Client required an IT solution addressing Manual backup operations, long backup time with windows and point solutions.

The objective was to ensure the deployed solution achieves the following;

- protection of the virtualized environments and physical servers at the central site
- Coverage of the desktop and laptops used by staff with data loss prevention in case of lost/stolen systems
- Centralized and Simplified Management
- Migration from point products to single unified Data Management platform
- Data reduction needed through de-duplication
- Disaster recovery solution for Data Management environment

The Solution

Through experienced project management practices and FPG professional delivery models, FPG deployed a FlexSecure product using Commvault Simpana software platform.

Business Benefits

- Clients can provide value to its customers using a consolidated backup environment.
- Faster backup time,
- Automated backup and restore.
- Flexibility in managing enterprise data.
- Agile, simple, and complete access to information and data

Project Deployment Duration: Ten Days.
