

Client is a financial institution ranked amongst the top ten in the Nigerian banking industry. A well-experienced and highly-regarded management team has successfully grown the bank based on the principles of passion, excellence and sound risk-management framework. The bank is focused on remaining a world-class financial institution providing superior financial services. Client currently has a widely distributed banking presence across all the major cities in Nigeria and in all the state capitals.

Sector: Financial
Solution: FlexSecure (Portnox)
Location: Lagos
OEM Partner: Portnox

The Challenge

In need of visibility, monitor, control and compliance of Devices, Endpoints and BYOD (Bring your own Device). An inability to effectively enforce, monitor and control the devices connected to the network exposes the bank to malicious attacks and other high security risks.

The objective of the project was to achieve the following using a secure and Flexible solution;

- Network access Control
- BYOD
- Network Visibility
- Data protection
- Guest Networking
- Audit and Compliance

The Solution

FPG using experienced project management practices and professional delivery model deployed a FlexSecure solution using Portnox Network Access Control.

Business Benefits

- Network Access Monitoring and Control, Visibility and Data Protection.
- Bank network Security and Flexibility.
- Agile, simple, and complete security and authenticated access to the bank's information and data management.

Project Deployment Duration: 30 days
