FPG TECHNOLOGIES & SOLUTIONS LIMITED HOLDS IT CONNECT EVENT TAGGED BUSINESS AGILITY WITH CONFIDENCE IN ABUJA

CEO FPG Technologies & Solutions Limited Mr Rex Mafiana - Delivering Extreme Business Agility with Confidence

FPG Technologies & Solutions Limited, one of Nigeria's foremost IT company known for providing mobile, cloud and IT security solutions to various sectors of the Nigerian economy with its partners Check Point Software Technologies Ltd a leader in network cyber security globally and Thales e-Security, a global technology leader for the Aerospace, Transportation, defence and security markets recently held its IT Connect event in the Hilton Hotel Abuja.

The event was focused on the Government sector with attendance from IT decision makers across various governments parastatals and agencies in Abuja. The IT Connect event theme was 'Delivering Extreme Business Agility with Confidence'.

Check Point's security Consultant Raphael Adaka through 'Debunking Mobile Security Myths' emphasized the importance of organisations investing in mobile threat defense solutions. In today's business environment, using mobile devices is a business requirement and an employee expectation.

Most companies allow personal devices to connect to corporate networks. Employees use these devices to download personal apps and email – these pose security challenges and expose business networks to phishing scams and malware infections. One compromised device can let cybercriminals steal sensitive information, or even spy on closed-door meetings using device microphones or cameras. Breaches are detrimental to organisations and corrodes brand reputation and competitive advantage. Remediation is costly and some loss may be irreversible.

Check Point Mobile Threat Prevention analyses mobile threat risks at the app, network, and device level using a lightweight app and powerful cloud engine. This design allows for more comprehensive protection from known and unknown threats, and shifts resource-intensive analysis to the cloud to minimize any impact on user experience and device performance.

Organizations are also adopting techniques such as encryption and digital signing—or shifting from software-based encryption and digital signing to high assurance hardware-based solutions. Cryptography protects data effectively only if keys are secure and well managed. Cryptographic keys are a critical component of an organization's ability to protect data from malicious attack while ensuring that the data is ready for use when needed. With unparalleled expertise in cryptographic key management, Thales provides solutions that manages keys efficiently and effectively to improve security, performance, and business continuity. Thales delivers innovative data protection products and services based on the most advanced technology and security best practices while maximizing operational efficiency, business continuity, and long-term scalability" says Rex Mafiana.

Rex Mafiana CEO of FPG Technologies & Solutions Limited asserts 'In these turbulent times, organisations need to keep their business nimble, flexible, and fast, which requires the right technology. FPG is built on solid principles and unprecedented customer focus. We give organisations solutions that help them get to market faster, respond to industry changes faster but we also provide the confidence to do this by ensuring that while these organizations are innovating they stay secure from internal and external threats or criminal activities'

"Research shows a connection between the use of cloud computing, increased business agility and competitive advantage. the enterprise Mobility market is growing exponentially; Mobility solutions enhance productivity and organisations want to be truly mobile with work regardless of profession and location. The interplay of cloud and mobility and the dependence on the internet, makes IT security a priority. The FPG advantage is unique, states Rex Mafiana, "we believe technology is about changing lives, businesses and governance for good. We are committed to Simplicity, Synergy, Flexibility and Go-beyond. We keep our customers well informed with latest trends and cutting edge technology. Business Agility is a mindset, a way

of life, a journey for the future - every business should embark on". FPG is one of the foremost IT security companies in the country, covering end to end security for organisations
