

AUTOMATED EMAIL PHISHING RESPONSE

IRONSCALES is the first and only solution to combine human intelligence with machine learning to automatically respond to email phishing attacks.

Our technology automatically protects enterprises in real-time from the financial, reputational and physical damages of targeted phishing attacks.

OUR SERVICES

EMAIL PHISHING REMEDIATION

IronTraps™, our patent-pending, automatic email phishing response module, empowers skilled and vigilant employees to report ongoing attacks by triggering Phishing Forensics™, through the click of ONE button. Upon clicking, a tailored remediation response that may include enterprise-wide quarantines, disabling of links and attachments, and removal of email, is initiated; ultimately reducing labor and ensuring that employees won't engage with the malicious email.

AUTOMATION & ORCHESTRATION

One of the most laborious measures a SOC team must take during an attack is combining all alert details to determine if the threat is in fact real, and, determining how to respond based on these details. With a fully automated remediation and detection system, SOC team members can easily compile alerts and streamline the data into a repeatable workflow, creating a defensive plan in just minutes.

SIMULATION & TRAINING

Users are challenged with a series of staged, real-world email attacks in order to evaluate their individual level of awareness. Based on performance, a tailored phishing training campaign, using advanced simulation & gamification, is created to maximize awareness and responsiveness to social engineering. Once trained, employees, upon suspicion of a phishing attack, can trigger a real-time automated forensic review through the click of a button.

GLOBAL PHISHING INTELLIGENCE

With Federation our users will gain unprecedented intelligence, in real-time, on dangerous and destructive zero-day email attacks, such as ransomware, malware, trojans and bots among others. As a result of this collaboration among IRONSCALES users, enterprises and organizations can proactively defend their network gateways and endpoints from increasingly frequent and sophisticated phishing attacks.

FEDERATION

With Federation, IRONSCALES users will gain unprecedented intelligence, in real-time, on dangerous and destructive zero-day attacks, such as ransomware, malware, bots, spam, spoofing, and pharming, among others. As a result of this collaboration among IRONSCALES users, enterprises and organizations can proactively defend their network gateways and endpoints from increasingly frequent and sophisticated phishing attacks.

A LAYERED APPROACH TO **SECURITY WITH IRONSCALES**

Layer 1 | Awareness

Building Awareness With Personal & Tailored Assessment & Training

Layer 2 | Detection

Immediate Phishing Mitigation Through Crowd Wisdom

Layer 3 | Auto Response

IronTraps Email Phishing Incident Response Solution

Layer 4 | 24-7 Intelligence

Real-time Automatic Anonymous Sharing Of Attacks Across Organizations

WHY **IRONSCALES?**

Today's commercially available anti-phishing cybersecurity solutions only deal with awareness, training and signature based filtering, inevitably leading to consistent failures with mitigating and remediating reported attacks in a timely manner.

Due to the high risk and high cost of phishing attacks, SOC teams can no longer rely solely on human intelligence as a defense mechanism, but must also bring in additional aids to help protect the integrity and confidentiality of their companies. That is where IRONSCALES multi-layered phishing mitigation & remediation solution comes in.

By integrating crowd wisdom with technology we increase the efficiency and machine learning of all your solutions (AV, SandBox, Firewall, IPS & Spam Filter) through a constant feedback loop built specifically to stop zero day phishing attacks.

IRONSCALES is the only email phishing solution seamless enough to reduce the workload burden on SOC teams by automatically remediating and analyzing incoming threats, and quarantining and deleting suspected phishing emails in real-time.

WHAT'S IN IT **FOR YOU?**

Low Maintenance and Quick Deployment

Reduce the SOC workload and resources compared to commercial anti-phishing solutions. Start running your first campaign in minutes. (Trial / Full Solution).

A Unified Solution & Reduced Costs

Unified dashboard and product integration spanning awareness to Remediation. Benefit from full coverage with 1 solution, with no hidden costs.

Integration with Enterprise Applications

Full SIEM, gateway and mail server-side integration for further remediation and visibility.

Compliance Assistance

Essential for internal auditing and cyber insurance coverage. IRONSCALES also helps companies comply with HIPAA, PCI, and many other industry-specific regulations.
