SOLUTION

FPG SECURENET

OVERVIEW

A NIGERIAN FINANCIAL AND SECURITY INVESTMENT COMPANY

Nigerian Financial Company licensed to carry on the depository, clearing and settlement of all transactions in the Nigerian Capital Market.

The company ensure safe and efficient transaction within the ecosystem, also provide single access point for all post-trade services in the Nigerian financial Market covering all forms of capital and money market securities including equities, treasury bills, bonds, commodities, funds, and cash.

BUSINESS CHALLENGES

HEALTH CHECK ASSESSMENTS NEEDED TO RESTRICT ACCESS TO RESOURCE ON NETWORK AND DEVICES.

The Company's wanted to restrict access to resources on their network and been able to identify, assess, and enforce access control on all devices before they connect to the network, with the ability to identify and profile each subsequent device wanting to connect, as well as: Perform health check assessments, enforce access control policies, and conduct remediation tasks in many cases.

FPG Technologies SecureNet product, a module of the FPG FlexSecure (FPG's end to end Enterprise Cyber Security Solution) suites using Forescout CounterACT NAC to deployed health check assessment.

FPG SecureNet provides protection for all things networks. Features include Gateway security, NGFW, Network Encryption, APT protection and so on. Through experienced project management practices, knowledgeable team and professional delivery models by FPG, the Company was able to Centralize control, visibility and management, get detailed views of the devices connected to the networks and the security posture of each device, this visibility provides actionable insights into the network's security risks.

Our commitment to people development and go-beyond culture ensure that your team will be reap value from our deployments working with the best people there are.

BENEFIT

UNWANTED ACCESS TO NETWORK DENIED.

With our end to Cyber & IT security offerings, covering Risk & Context, Network, Users and usage, Web and Cloud, Mobile, Data and Application as well as your brand security, we were able to deliver the confidence the organization needed while driving business agility and growth.

We ensured the organization is secured in the midst of so many moving parts and constant business and technologies changes. The NAC solution's automation reduced administrative overload, increased Patch Management, visibility to devices within the company's environment, as well as streamlined approach to managing their Cybersecurity infrastructure. All unwanted access to network was denied to non-compliant user devices.
